

AHAMMED

AI Automation Specialist | AI & Full Stack Developer

Dubai, United Arab Emirates | +971 521352484 | ahammedmass24@gmail.com | Portfolio

PROFESSIONAL SUMMARY

AI Automation Specialist and Full Stack Developer with 4+ years of hands-on experience building and deploying AI-powered automation systems, CRM workflows, customer communication solutions and business process automation.

Experienced in end-to-end automation infrastructure using n8n, Zapier, APIs, webhooks, Bitrix24, Odoo, Node.js, Python and AI/LLM technologies, including AI chatbots, conversational workflows, lead-management systems and integrations across business platforms. Comfortable across the full lifecycle, from requirements and architecture to development, API integration, deployment, monitoring and production support.

AI Automation • AI Agents • CRM Automation • WhatsApp Automation • Business Process Automation • API Integrations • Full Stack AI Development

TECHNICAL SKILLS

AI Automation & Agents	AI Agents, LLM Integrations (OpenAI, LLaMA), Prompt Engineering, Conversational AI, AI Chatbots, RAG, LangChain, LlamaIndex, Claude Code, Codex, Copilot
Automation & Integration	n8n, Zapier, Workflow Automation, Business Process Automation, REST APIs, Webhooks, Cron Jobs, Scripts and Bots, Third-Party Integrations
CRM & ERP	Bitrix24 CRM Customization, Odoo ERP Module Customization, CRM Workflows, Lead Management, Lead Source Tracking, Sales Automation
Customer Communication	WhatsApp Cloud API / Business API, Website Enquiries, Lead Qualification, Follow-up and Booking Workflows
Backend	Node.js (Express.js), Python (FastAPI, Django), PHP, Authentication and Authorization, Server-Side Business Logic
Frontend	Next.js (SSR, ISR), ReactJS, JavaScript, TypeScript, HTML, CSS, Responsive and SEO-Friendly UI
AI / ML	RAG Pipelines, Vector Search (FAISS, Pinecone), Embeddings, Hugging Face Transformers, OCR (Tesseract), NLP, Computer Vision (OpenCV), Face Recognition
Databases	MySQL (schema design, indexing, query optimization), PostgreSQL, MongoDB, Redis (caching, sessions)
Cloud & DevOps	AWS (EC2, Lambda, RDS, S3, CloudFront), Azure, Docker, NGINX, CI/CD
Tools	Git, GitHub, Bitbucket, Jira, Figma

WORK EXPERIENCE

AI Automation & Full Stack Developer | Travnook, Dubai

Nov 2025 – Present

- Built and managed end-to-end AI automation infrastructure for customer communication, lead management, sales and business operations.
- Customized Bitrix24 CRM and Odoo ERP with scripts and automated workflows for lead management, sales processes and internal operations across departments.
- Developed WhatsApp, website and CRM automation covering customer enquiries, lead tracking, source attribution and follow-up workflows.
- Built API and webhook integrations connecting CRM, WhatsApp Cloud/Business API, booking systems, marketing platforms and other business applications.
- Implemented AI-powered conversational workflows, automation bots, Tesseract OCR pipelines and NLP-based document processing to reduce manual work.
- Developing a custom ERP with full AI integration, including a face recognition model for attendance workflows.
- Deployed and ran production systems on AWS (EC2, Lambda, S3) with backend services and databases.
- Team Lead: hired and managed 3 assistant engineers, owning sprint planning and end-to-end delivery from requirements and architecture to deployment and optimization.

Freelance AI Automation & Full Stack Developer

Apr 2023 – Present

- Delivered AI-powered applications and business automation solutions across multiple domains, focused on production-ready GenAI.
- Built LLM-powered conversational workflows, chatbots and AI-assisted user experiences, with frontend and backend APIs.
- Developed Python AI services including RAG pipelines, vector search (FAISS, Pinecone), document processing and embedding workflows.
- Integrated OpenAI, LLaMA and Hugging Face models into applications with prompt engineering and fine-tuning.
- Built an n8n-based automated job-application pipeline integrating ScrapingBee and OpenAI with human-in-the-loop approval.
- Built an intelligent email auto-response bot using n8n, NLP and Docker for intent detection and urgency classification.
- Owned delivery from proof of concept to deployment, including client scoping, sprint planning and post-launch support.

Full Stack Developer | WizzGeeks Technologies, Electronic City, Bangalore

May 2022 – Aug 2025

Medsy.ai – AI-Based Medical Platform

- Played a major role in both the admin and user panels of an AI-based medical platform.
- Integrated full AI functionality and UI flows across the application, from frontend experience to backend services.

QuestionCloud – AI-Driven Learning Platform

- Developed both admin and user web panels.
- Integrated Tesseract OCR to extract syllabus content into embeddings, enabling AI-generated questions from syllabus content.
- Integrated a RAG model for retrieval-augmented Q&A.

GUVI Zen Class

- Front-end development using ReactJS, ensuring a responsive and intuitive UI/UX.

PROJECTS

Auto-Gen-Bolt – AI Automation Platform 2 months

- AI-powered automation tool integrating the LLaMA model for intelligent code generation and task automation.
- Automation utilities for text processing, file handling and web tasks in a unified ReactJS + Python interface.

Meditrack – AI Medicine Inventory System 1 month

- Admin and user portals to manage medicine stock and purchases, with AI to predict stock depletion and best sellers.
- OCR/NLP for scanning prescriptions and identifying medicines.

Police Petition Management System 2 months

- 3-role portal (User, Admin, Super Admin) with NLP to classify cases by severity and route them accordingly.

APT.OS – SaaS Real Estate ERP 1 month

- Premium SaaS ERP for real estate management with a 3D command center for property visualization.
- React, TypeScript and Three.js frontend handling multi-tenant data, analytics and orchestrator logic.

Learn Anything with AI 3 weeks

- Educational platform generating interactive 3D knowledge roadmaps for any topic using AI.
- Generative AI for Socratic tutoring sessions and dynamic quizzes tailored to user progress.

EDUCATION

B.E. Computer Science Engineering 2021 – 2025

Excel Engineering College, Komarapalayam, Tamil Nadu · CGPA 8.0

Higher Secondary School 2018 – 2021

A.R. Matriculation Higher Secondary School, Salem, Tamil Nadu · SSLC 78%, HSC 84%

LANGUAGES & STRENGTHS

English, Tamil, Malayalam

Teamwork, Problem Solving, Communication, Time Management, Creativity

CERTIFICATIONS

- MERN Stack Developer course – Udemy
- Python course – GUVI
- MongoDB Intermediate certification – MongoDB
- Government typing examination – A+ grade

INTERNSHIPS

- Web Development, 90 days – Crescent Infotech, Erode
- Python Development, 20 days – FutoGen Computer Education, Salem
- Python basics to standard, 14 days – Maxlore Innovation LLP, Calicut
